-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 15-18, 29, and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Wood et al. (Wood; 6,091,808; cited by the examiner and applied for the first time).

With respect to the independent claims, the entire patent to Wood plainly teaches the claimed method and systems for accessing call-related information associated with telephony services via a public data network; refer to Figs. 1-3. The claimed subscriber terminal reads on the WEB BROWSER 12. The claimed plurality of telephony network nodes read on the TELEPHONE SWITCH 16. The claimed converting the request for call-related information into a format compatible with the plurality of telephony network nodes and transmitting the converted call-related information request to a telephony network node have to be inherent and take place between the WEB FACILITY 22 and the TELEPHONE SWITCH 26; some type of converting must take place in order for the WEB FACILITY 22 and the TELEPHONE SWITCH 26 to communicate. Wood ultimately teaches the log of call-related information (Fig. 3) is transmitted to the subscriber terminal.

With respect to claims 2 and 16, Wood teaches receiving from the subscriber terminal a request to activate a telephony service; see column 9, lines 46 - 64.

With respect to claims 3 and 17, Wood teaches receiving from the subscriber terminal a request to initiate a call to a directory number associated with the received log of call-related information; see column 2, lines 6 - 16.

With respect to claims 4, 18, and 30, Wood teaches sending a subscriber identification request for display at the subscriber terminal for the purposes of authentication; see column 2, lines 21-30.

### ***Allowable Subject Matter***

3. Claims 5-14, 19-28, and 31-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents 6,714,641 B2 and 7,020,262 B2 are cited by the examiner since they are related to patent 6,259,771 B1 cited by the applicants.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harry S. Hong whose telephone number is (571) 272-7485. The examiner is normally off on Wednesdays.
